

DRIVADAN container systems is aimed at mono-crop growers who wants maximum utilization of his greenhouse area and who has a continuous high production flow.

DRIVADAN containers incorporates following features:

- Container top part in pure aluminium and shaped for robot, crane, stacker and washer use.
- Welded and grinded bench corners.
- Bench top part available with ebb & flow plastic top, perforated styrofoam plate, sea-proof aluminium plates, galfan mesh and steel gutters.
- Rollers on roller conveyers may be placed on the outer side of side-member when roller conveyer is used as work-station.
- Unique flexibility in combination with our stationary work-stations suitable for propagation areas or special labour demanding crops e.g. Jasmin Polyanthum.
- DRIVADAN supply also cranes, spacing robots, stackers etc.
