

DRIVADAN roller benches is aimed at the grower who want a flexible bench system combined with a high degree of greenhouse area utilization.

DRIVADAN roller benches incorporates following features:

- Flexibility combined with a high degree of greenhouse utilization.
- Unique anti-tilt bracket system allowing wider space between benches than competitive roller bench systems.
- Roller-pipe stop member assuring length-directed bench position.
- Hot-galvanised bench legs for concrete casting or concrete floor mounting.
- Height adjustable el-galvanised roller bar for roller pipes.
- Available with ebb & flow bench tops, ebb & flow bench troughs, bench troughs with running water and styrofoam plates.
- Available standard widths 1,00m, 1,20m, 1,43m, 1,52m, 1,82m and 2,02m. Tailor made bench widths upon request.
- Available with 120 mm high edge profiles assembled with rigid rounded aluminium corners.

Luxury working space between benches

Rounded rigid aluminium corners
