

Screen installation is one of the major important tools sustaining optimum climate conditions for your plants.

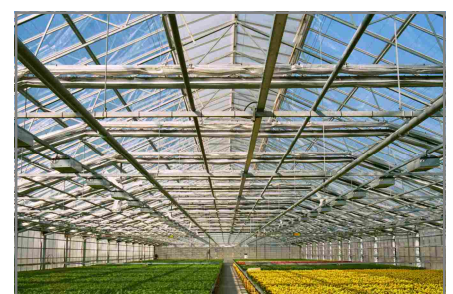

DRIVADAN design, supply, install and service all types of screening systems within the greenhouse industry.

### **DRIVADAN screen installations incorporates following:**

- Shading screens in combination with energy saving.
- Blackout screens in combination with energy saving and in addition in combination with shading.
- Roller screens providing shading and/or blackout with maximum daylight entrance.
- Partition roller screens available with standard roller screen cloth material or our recommended clear foil.
- Insect netting preventing bugs from outside to enter the greenhouse.
- Screen cloth available with flame retardant performance.
- Installation executed with our own experienced technicians.
